

**Part 2: Assessment of the quality of research results for Instructional Support and Development**

Please mark ✓ in the box □ on the right hand side that best matches your opinion.

(5 = most, 4 = very, 3 = moderate, 2 = less, 1 = least)

Evaluation Items	Level of Quality				
	5	4	3	2	1
1. The results achieve the main objectives of the research.					
2. The results of the research can solve problems / make improvements					
3. The value of research, compared with the factors used in research (time, labor, budget, etc.)					
4. The research and intellectual property generated by the research are disseminated nationally and / or internationally.					
5. The levels of problems and obstacles when conducting the research					

**Highlights of the research and its significance (answer more than one question)**

- Solve problems and develop according to the university's development strategy. (specify) .....
- Research collaboration is a network between the public and private sections. (specify) .....
- Create new knowledge / innovation. (specify) .....
- Local wisdom development (specify) .....
- Create a new researcher (researcher development) (specify) .....
- The significance of the research is widely used. (specify) .....
- It contributes to economic and social added value and culture (specify) .....
- Others (specify) .....

**How did the researcher solve problems and obstacles?** (specify)

.....

.....

**How does your organization handle or address the problems and obstacles?** (specify)

.....

.....

**No problems and obstacles**
